

Science Fair

On Friday 3rd February Whyteleafe School held its very first Science Fair. Children from Years 1 to 6 completed incredible science projects with the aim of becoming 'Whyteleafe Scientist of the Year'. Each project demonstrated fantastic scientific thinking and reasoning and it was clear that the children had taken pride in their work.

The projects were showcased in the hall for the rest of the school and parents to see and enjoy. The judges had an extremely challenging task of deciding a winner.

These are the Science Fair Winners.

GLF Science Fair Grand Final

This term the children were invited to take part in Whyteleafe's first Science Fair. The children created amazing science projects, investigating a range of different scientific questions. The amazing projects were displayed for the rest of the school and parents to enjoy.

On Wednesday 1st March, the winners and runners up from our school fair were invited to take a part in the GLF Science Fair Grand Final held at The University of Surrey. The children were given the opportunity to display their projects in the hopes of becoming 'GLF Scientist of the Year'.

Throughout the day, the children were able to view all the projects entered into the final as well as explore the many exhibits and take part in fun experiments. There was also a key-note speaker, Jim Al-Khalili, the Head of Physics at the University and a regular presenter of science programmes on Radio 4 and the BBC.

This was an incredible day and an fantastic opportunity for the children to experience hands-on science. All the children had a wonderful day.

Congratulations to all the children and schools who took part, and a particular special congratulation to Oliver Scott, whose investigation was selected as a GLF runner up.
