

# Maths

10. Consider the value of a set of 5p coins and a set of 10p coins.

Consider the value of a set of 5p coins and a set of 10p coins.

The screenshot shows a video player interface. At the top left, the text reads "Video lessons for primary age children". To the right is the logo for the "National Centre for Excellence in the Teaching of Mathematics". Below this, a teal bar contains the text "Key Stage 1: Multiplication". Underneath, it says "Lesson 10" and then "Consider the value of a set of 5p coins and a set of 10p coins". At the bottom left, there is a "Play (k)" button. The video progress bar shows "0:09 / 9:10". At the bottom right, there are icons for full screen, settings, and other video controls.

For this lesson you will need some 5p and 10p coins.

10. Consider the value of a set of 5p coins and a set of 10p coins.

Enjoy playing shops!

Remember everything has to be a multiple of 5 so it can be paid for with 5 pence coins.

10. Consider the value of a set of 5p coins and a set of 10p coins.

Click on the link and complete the questions for lesson 10.

How many coins are there?

The image shows a visual discrimination task. At the top, it asks "How many coins are there?". Below the question, there are five 5p coins arranged in a row. Each coin is a silver-colored five-pence coin with the text "FIVE PENCE" and a royal coat of arms. Below each coin is a circle containing a vertical column of three black dots. This represents a 1:1 correspondence between the coins and the dot patterns.
