Stop at 1.22

Think about the amazing job the NHS have done throughout the pandemic

Do you have a relative or family friend that works for the NHS?

Is there anyone in particular you would like to write your letter to?

Thank You NHS

Thank you to the NHS for the work you do each day,
I don't know what we'd do without you, and I just wanted to say...
I'm very thankful for all you do, and for always saving lives,
You're forever fighting illnesses to help people survive.

All the staff are heroes, along with the dedicated volunteers,
You've helped millions of people for more than 70 years.
You're putting yourselves at risk, and your vulnerable family too,
But that doesn't stop you fighting on, with determination in all that you do.

You appreciate all keyworkers for supporting you at this time,
Teachers supervise children while you work on the frontline.
Porters, cleaners, delivery drivers are holding things together,
Scientists working on vaccines so we're not in this forever.

Windows are filled with rainbows, spreading positivity and pride,
People emotionally clapping to spread gratitude far and wide.
Knowing that you're there for us alleviates our fears,
And inspires us to join the NHS as one of your volunteers.

Dear Dr. Leafe,

I am writing to you because I and the community would like to honour how brave, courageous, resistant you are to fight against COVID-19 and continue to persevere against the virus even if times are rough for you and your family.

We need you in the current situation because, without you many people would tragically lose their lives and spread coronavirus throughout the entirety of England. Around 20,000 people have been tested positive for COVID-19 and with you helping us, the amount of people will gradually lower until there is no more people that have it in the world. In my opinion. Your job is one of the most important jobs in the world because you help save lives every day.

To help you and your co-workers I promise to follow the UK Government's advice, wash my hands frequently, and self-isolate until further notice. Thank you for protecting our wellbeing and fighting against COVID-19. With you helping us I feel less worried and more reassured.

Yours Sincerely,

Nicolas

Dear Dr Leafe,

I am writing to show my gratitude for everything you are doing in regard to the Coronavirus. You are saving lives every day and I truly believe that you are more important than ever during this distressing situation.

I can barely imagine how stressful it must be to deal with floods of patients every day, putting your life at risk to save the more vulnerable. You have shown limitless bravery and selflessness, which are irreplaceable during the worldwide pandemic. It is amazing to see that you have kept your head while all around you have lost theirs. Here at Northampton Academy we believe that determination is one of the most significant values that someone can have, and you have only proved that by carrying out your life changing work. The amount of recoveries in the UK is because of you. Because of everyone at the NHS. You are saving lives.

Please continue your work and you can make a difference to more lives. You are an inspiration to not just me, but so many more people out there who aspire to go into medicine. I believe that eventually, a cure for Coronavirus will be found, and you will be a part of it. Thank you.

Yours sincerely,

Isabelle

Dear Dr. Leafe,

I'm writing this letter to you because I just wanted to say from the bottom of my heart that you are doing an amazing job and doing the best you can to keep everyone safe from the Coronavirus pandemic. You have shown wonderful dedication and determination through this tough time for all of us.

This situation we have been put in is very challenging for all of us, but it must be even worse for you and your fellow NHS workers due to there being a rising number of Coronavirus cases in the UK. This Coronavirus outbreak has caused over 20,000 people in our country to be infected and is leaving the rest of us feeling very frightened on what is going to happen next. Although you are putting your patients first just take some time and think what a difference your hard work is doing to this country to help fight that horrific virus.

What would this country do without your hard work and the determination you have put in during this challenging time?

In my opinion, you have got one of the most important jobs during this pandemic. Please keep doing what you do best and keep us safe and most importantly keep yourself safe from this deadly virus.

Yours Sincerely,

Megan
